The Open Sea is of Type I Group A* and meets all the most restrictive criteria of the ISO 9650 standard. ISAF regulations recognize and accept ISO 9650-1 life rafts. The design and the materials used to construct the life raft give it remarkable solidity that is perfectly adapted to open sea sailing.

Made of 100% bonded PVC fabric, based on Zodiac® Thermobonding™ and high-frequency technology, the Open Sea is both resistant and very visible. The aluminium-coated insulated bottom protects passengers from the cold and the humidity. Once they are filled, the water pockets attached under the life raft serve as ballast (240 litres) and provide the Open Sea with optimal stability. The delicate phase of boarding is facilitated by the semi-rigid access ramp as well as the interior ladder. It is compact and light so launching is easy. The life raft and its arch inflate instantly when triggered. Inflation with CO2 is carried out within a temperature range of -15 to 65 °C. The liferaft is also equipped with a rainwater collection system.

These elements, a sign of superior quality, ensure the reliability of the Open Sea ISO 9650, even under adverse meteorological conditions (strong winds, high waves).

The Open Sea ISO 9650 is available in four models that can accommodate four to ten people and are stowed in a container or a bag.

Zodiac® has a large network of approved stations that can perform the mandatory triennial inspections at very competitive rates. The Open Sea is guaranteed for 12 years**.

*According to the ISO 9650 standard, there are two categories of life rafts: Type 1 for open sea sailing and Type 2 for coastal navigation. Beyond six miles from a shelter, possession of a life raft is mandatory. The choice of the type is left to the captain.

** Life raft guaranteed for 12 years under the conditions defined in the contract which can be obtained from your reseller.
When fully equipped, the Open Sea ISO 9650 includes all the elements which are essential to human survival on the open sea during 24h. The equipment included exceeds the requirements of the standard. A grab bag should be added for autonomy exceeding 24h. It floats, is watertight, and contains the additional equipment needed if rescuers will take longer to arrive. It also has a tie-down system for additional safety.

### Equipment for Less than 24H

**Equipment**
- Rescue buoy + 30 m line 1
- Floating knife 1
- Sea anchor + line 1
- Bailie 1
- Sponge 2
- Pair of floating paddles 1
- Repair kit 1
- Pump 1
- Raft operating instructions 1

**Signalling equipment**
- Hand-held flare 3
- Parachute flare 2
- Whistle 1
- Signalling mirror 1
- Electric torch 2
- Spare batteries and bulb 2

**Medical equipment**
- Seasickness tablets 6 / pers
- Seasickness bag 1 / pers

**Survival rations**
- Water in sachets 0.5 litre / pers

### Equipment for more than 24H

**Equipment for more than 24H**

**Medical equipment**
- First aid kit 1
- Hand-held flare 3
- Thermal blanket 2
- Sunscreen cream 2
- Water in sachets 1 litre / pers
- Food rations 10,000 KJ / pers
